

Work Smarter with the new Designer Portals UI

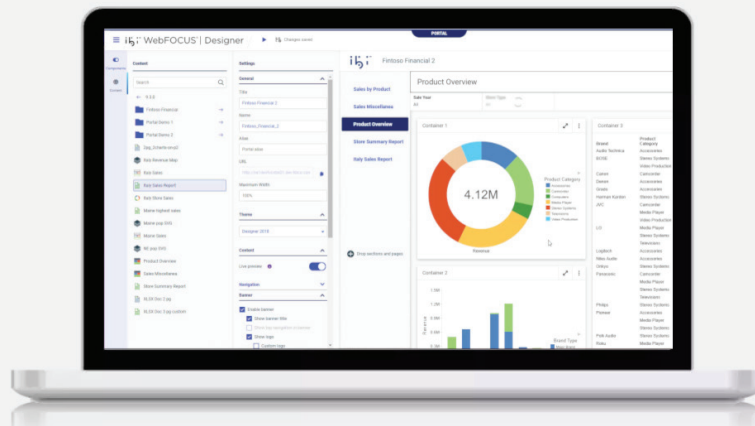

The release of ibi™ WebFOCUS® 9.3 included the new Designer Portals UI—ushering in a new era of user-centric portal development. Gone are the days of wrestling with complex configurations. This intuitive interface empowers you to seamlessly craft the perfect platform for your data story. The new Designer Portals UI takes user experience to the next level.

Designed to automate the distribution and scheduling of reports and dashboards generated by WebFOCUS, ReportCaster supports multiple administrators and provides a single point of control for managing information distribution within an organization.

Level up your designs with the new Designer Portals UI in WebFOCUS

Here's how these innovative features streamline workflows and empower users:

- **Visualize your portal:** Step away from cumbersome menus and embrace the interactive content tree. This acts as your visual roadmap, guiding you through the portal structure and making organization a breeze.

- **Drag-and-drop efficiency:** Let the canvas become your playground. Build your portal directly on the screen with interactive toolbars at your fingertips. Drag, drop, and arrange—allowing you to effortlessly manage content and visualize your portal as it takes shape in real-time.
- **Customization at your fingertips:** Don't worry, the power of personalization remains. All the existing customization options

you've come to rely on are still here.

- **Flexibility while adding content:** You can choose to add the content either as a copy or a link. This provides you with the flexibility to have the content edited separately from the existing item, or to add it as a shortcut.
- **Focus on creation without losing your place:** The new WebFOCUS Portals UI eliminates the save button. All edits occur in real-time, saving directly to the Repository. This streamlines your workflow, letting you focus on building impactful data stories without worrying about losing your work.
- **Open an existing portal in the new portals UI:** The new WebFOCUS Portals UI embraces your past. Open and edit existing Designer portals directly within the modern interface. Leverage drag-and-drop, real-time editing, and a sleek design – all while preserving your current customizations. It's a seamless transition to a more effortless portal experience.

Life is made easier at every stage of the data exploration journey.

Overall, the new WebFOCUS Portals UI acts as a user-centric bridge between complex data and clear understanding. It simplifies portal creation, streamlines information access, and empowers collaboration—making life easier for users at every stage of the data exploration journey.
